

# DELL Technologies WORM-Appliance

AUDIT-PROOF LONG-TERM DATA ARCHIVING

The WORM-Appliance consists of **DELL Technologies hardware** and the **GRAU DATA software FileLock**.

## WHAT IS THE DELL TECHNOLOGIES WORM-APPLIANCE?

The hardware and software solution to guarantee WORM functionality on Windows file systems (WORM = WRITE ONCE READ MANY).

## WHAT DOES THE APPLIANCE DO?

Written files are provided with WORM protection and can be read afterward, but cannot be changed or deleted within the set retention period.

## WHY DO YOU NEED THIS APPLIANCE?

Certain business-critical data must be stored immutably in accordance with country-specific laws.

## Highlights & advantages

- Audit-proof –  certified: SEC 17a-4 (f) GoBD/BAO/GeBÜV, etc.
- Scalable – 3 pre-defined product configurations (8 TB, 24 TB, 60 TB)
- Standard Windows operating system and x86 hardware instead of proprietary solutions
- Simple integration into existing infrastructure
- Filesystem interface and NetApp SnapLock interface integrated
- Compliant replication as standard included
- Cost-effective

## The product variants

### Model S

- Storage capacity: 8 TB (net)
- License: 36 / 60 months
- Basis: PowerEdge R440

### Model M

- Storage capacity: 24 TB (net)
- License: 36 / 60 months
- Basis: PowerEdge R540

### Model L

- Storage capacity: 60 TB (net)
- License: 36 / 60 months
- Basis: PowerEdge R440

### Model XL

- Storage capacity: 60 TB +
- License: 36 / 60 months
- Basis: On request

## Our target markets

 Healthcare industry

 Chemical industry

 Security industry

 DMS manufacturers

 Pharmaceutical industry

 Public institutions

 Financial sector

 Research institutes

 Automotive industry
